Rome was not build in a day

eCS 2.0 the final pull

- eCS 2.0 silver was last test release. GA will be next

- ACPI, not default, instead "modern hardware, safe mode"

- ACPI, determine final version to be used.

- Fixes for JFS/UniAud HDA/Panorama fix (mtrr)

- Amouse fixes for SMP

- CD #2

- perform test installation/test network reconf

- process FAQ's / finalize documentation

eCS 2.0 what was done

- Since eCS 1.2R over 850 bugs resolved

- Major updates to eCS like bootable JFS, installer updates, Panorama, Samba, disc resizer, preboot menu, multi-core support

- ACPI support has come a long way: embedded controller, SMP and APIC support enhanced. Suspend Resume (S3 state).

Updates since Warpstock 2008 I

- Majorly improved preboot menu (2 months work)
- Video reset/video wizard
- LVM wrapper, Windows Disc signature
- Added CD boot support for Panorama/GRADD(T23)
- ACPI wizard greatly enhanced (notebook/desktop detection)
- Since eCS 2.0 RC6 174 bugs resolved
- Further improved Samba GUI

Updates since Warpstock 2008 II

- Published OpenOffice.org 3.1.1
- Published preview version of Flash 10 plugin
- Created real eComStation Server Edition (WSeB based on eComStation core)
- GpfRexx
- Sundial Systems taking over products

Past eCS 2.0 I

- Continue updates of ACPI, ACPI never sleeps.
- Update support for hard discs bigger than 512GB to 2TB.
- Possible ways to support HDD over 2TB
- Support AHCI/SAS disc controller
- Enhance USB drivers/USB 3.0
- Possibly load OpenOffice.org / Mozilla suite in high memory.

Past eCS 2.0 II

- Patch kernel where possible, take BIOS calls out.

- C't article about EFI about 4 months ago.

- Possible support for GPT disc layout

Can it all be done with eCS I ?

- Lou again :-) (video)

- "We" need to do it: David Barnes "1993 OS/2 vs NT Shootout Part 2" (audio clip)

- Corporate sales of eCS increase! (examples)

- Best corporate sales year ever :-)

- More funding due to companies buying eCS!

- Japanese developer who worked for IBM on kernel/SMP/drivers (more people)

Can it all be done with eCS II ?

- Found orginal developer of Netbios over TCP/IP/NFS!

- 2 more developers found that will work for us!

- Communicate to find people!

Marketing!

- Limited resources, pick markets!

- Christian Hennecke

- www.ecomstation.com/atm (www.atmmarketplace.com)

- New paper handout.

- eCS demo CD very successful. (update coming). Over 30.000 downloads!

- Affiliate network (Joachim)

Demo

- WPS long file name fix (source code needed WPS ?)
- Flash 10 demo
- Suspend resume T60 SMP working!

Questions!?

- Questions, any ?
- Anybody wants to help out with eCS ?
- Who can help Mensys with community work ?
